- Spanish

SKILLS

Management Skills
Leadership
Problem solving
Responsibility
Teamwork
Time management
Proactive
Negotiation
Communication

EXTRAS

Panamerican Master Swimming
Champion (2013 and 2015)

EXPERIENCE

PROJECT MANAGER

Apr 2025

BuscaMed | Chihuahua, Chih

- Designed and implemented the BI infrastructure from zero: automated dashboards, executive reporting, and KPI tracking across Sales, Engineering, Logistics, and Operations, areas that previously had no measurable objectives
- Built and maintained automated reports delivering 61+ hours of savings per month, including a daily sales dashboard (6 channels), automated quotation reports, and monthly business summaries, all running without manual intervention
- Led sprint planning, backlog management, and Linear/Swarmia implementation for the engineering team, introducing DORA metrics, story points, and velocity tracking for the first time
- Validated production deployments against requirements, identified bugs, and created tickets independently
- Directly managed the UX/UI designer with daily 1:1s, overseeing design handoffs and ensuring alignment between design and development
- Proposed and led 15+ cross-functional initiatives across product, operations, and strategy, including automation workflows (n8n), internal tooling adoption (Slack, Linear), process documentation presented to leadership, and full coordination of a product launch event impacting Sales, Marketing, Logistics, and Engineering
- Proposed and documented structural improvements in HR processes (360 reviews, punctuality incentives) and operational workflows (medication labeling, sales quotation automation) with full impact and metrics frameworks

PROJECT ENGINEER

July 2017- Jan. 2025

FORTED | Ciudad Juárez, Chih

- Management and development of new projects by defining project critical activities and milestones
- Leading the project team
- Gathering customer requirements and analysis for new project development
- Presenting quotes to clients and addressing concerns
- Following up on quotes to secure sales
- Monitoring and controlling project development and progress
- Customer interface for project definition and ensure customer satisfaction
- Manage the company social media and content
- Development of new production lines for new products
- Researched and implemented sales strategies on Mercado Libre and e-commerce platforms, successfully launching online sales operations and increasing digital presence
- Increased sales by an 85% in comparison to previous years

PROJECT MANAGER

Aug. 2016 - Dec. 2016

TGC | Chihuahua, Chih

- Working with customer to manage the development of an automated data-loading system into the "Recaudador platform"
- Developing project schedule to ensure delivery dates
- Presenting project status and results
- Generating user and installation manuals for system usage

PROJECT MANAGER

May 2016 - Aug. 2016

Molex de Mexico (vision system) | Ciudad Juárez, Chih

- In charge of making the schedule for the project to stick to the delivery dates
- Making requests for the material
- Presenting project status and results
- Generating and creating user manuals for vision systems
- Leading and planning the development of the vision system projects. The process of quality inspection was improved by 20% in comparison to the previous vision system. System design equipment was also updated and upgraded to improve the quality inspection process
